

DOCKET NO: 245435US2

IN THE UNITED STATES PATENT & TRADEMARK OFFICE

IN RE APPLICATION OF :
SEIGO KODAMA, ET AL. : EXAMINER: YAM, S.
SERIAL NO: 10/705,974 :
FILED: NOVEMBER 13, 2003 : GROUP ART UNIT: 2878
FOR: CALIBRATION METHOD AND :
DEVICE IN ELECTRONIC COMPONENT
MOUNTING APPARATUS

RESTRICTION RESPONSE

COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

In response to the Office Action dated September 27, 2005, Applicants herein elect group I corresponding to claims 1-4 and 10-12, drawn to a calibration method and device with calculating a positional relation between a board recognizing camera and a component recognizing camera/component pick-up portion, classified in class 250, subclass 559.44 **with traverse** for prosecution in the present application.

Applicants traverse the outstanding Restriction Requirement as the outstanding Restriction Requirement has not established that an undue burden would be required if the Restriction Requirement was not issued and if all the claims were examined together. More particularly, MPEP §803 states:

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to independent or distinct inventions.

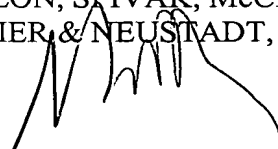

Application No. 10/705,974

Reply to Office Action of September 27, 2005

In the present application any search of the elected claims would also include the classes and subclasses appropriate for searching the non-elected claims, and so then would be no undue burden if all of the claims were examined together.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER, & NEUSTADT, P.C.
